Broecker and Kunzig, Fixing Climate, Three Books Publishing, 2008.

One billion people will be impacted by a 25 rise in sea level:

Christian Aid Agency, Human tide: the real migration crisis, May 2007.

The USGS says 700 million with a rise of 25 feet and 2 billion with a rise of 240 feet.

United States Geologic Survey, Center of Excellence for Geospatial Information Science (CEGIS)

http://cegis.usgs.gov/sea_level_rise.html

Global warming creates mega droughts 200 years long with less than half of the rainfall that we had during the Dust Bowl:

See references above for continental scale changes and desertification.

Weather forecast reliability:
